# ABOUT US

Mission: PACKAGING CO-CREATES PRODUCT

Polipack was established in 1992. The company operates state-of-the-art factory equipped with machinery manufactured by producers of international repute. We process plastic in the following technologies: injection moulding (IM), injection stretch blow moulding (ISBM) and extrusion blow moulding (EBM). Our expertise is in the manufacturing of high quality plastic packaging: polypropylene, PET and polyethylene. Our packagings are applied in the following sectors:

## Cosmetics • Drugs and dietary supplements • Tobacco goods • Food products

- 100% qualified supply base
- Suppliers are audited and subject to BRC PM evaluation system.
- We provide 100% traceability of direct materials used in our production.

Our packagings feature top quality and standards, proved by the following certificates:

- Quality Assurance Certificate ISO 9001:2015
- Environmental Management Certificate ISO 14001:2015
- ISO Certificate 15378:2017 Primary packaging materials for medicine products. Particular requirements for the application of ISO 9001:2015, with reference to Good Manufacturing Practice(GMP)
- BRC Certificate - Global Standard for Packaging Materials Issue 6
- Certificate of the National Institute
- Ecocert

## Packaging personalization

Thanks to the use of different decorative techniques, we can guarantee our customers that their jar will be recognizable and unique:

## WE WILL PREPARE YOUR GRAPHIC DESIGN

Order the print design using selected technologies:

**SCREEN PRINTING • PAD PRINTING • HOT STAMPING**

Do you have an idea for a product but you don't have print project?

Contact us and order a designing service!

Wait for a project add your comments and order final product!

Enjoy your new packaging with your customized print!

**ISO**

We hold the ISO 14001:2015 Environmental Management certificate.

We heat our premises with renewable energy from the ground or with heat recovered from cooling our production equipment, compressors and ventilation.

We use drinking water from the water system, using the e-spring treatment system.

Our production process and the method of processing PP, PE and PS involve 100% technological recovery.

Our waste from PET processing is 100% recycled and is used to produce clothes and multi-layer foil.

We protect our forests by using 100% biodegradable cardboard pallets, which are free of any splints and nails.

90% of our documents are circulated in electronic versions.

We segregate our waste and use a closed process water circulation system.
